

BYC05 Gail**RT 12/4/89** YOUTH CENTRE – Young mum's group

Age 30, so too old for the study but I thought it was worth talking to her any way. I was told by the community worker to 'make the most of her'. She didn't want to talk to me and finally agreed to give me five minutes.

Seems to have just split up with her 2nd husband, I think that he was violent towards her from the conversation I picked up on between her and her friends. She has taken an injunction out against him. Very strong, opinionated, loud and forthright. Seems to have had a 'hard life'. She started talking about non-penetrative sex to her friends at which point I persuaded her to do an interview.

She was very sussed about the risks of HIV and AIDS and how to protect yourself, as she is about sex in general. Very short interview - all that I could get from her but it's worth it.
